

PRODUCT ROLLOUT ANNOUNCEMENT

March 9, 2010

To: Valued Aspen Customers, Sales Reps, and Employees

Re: CC Series Light Commercial Coils

Our new CC series light commercial coils are now available! Attached is a spec sheet. Here are just a few of their many features:

CC Series Light Commercial Coil Features and Benefits

- Available in 6, 7-1/2, and 10-ton
- C series only available in upflow or downflow, not multi-position or horizontal. BH slab horizontal still available.
- Rifled copper tubing, aluminum fins.
- Immersion-tested at 500 psi, then nitrogen-pressurized and sealed.
- 3/4" FPT plumbing connections
- Left-hand refrigerant and plumbing connections.
- Externally mounted Schrader valve for hiss-testing.
- Factory-mounted R410a TXV.
- Powder-painted galvanized steel drain pans. Stainless available.
- Embossed galvanized cabinets standard. Cabinets feature furnace connectors (patent pending).
- Upflow without field modification. Downflow applications require plate kit, included.
- Split access doors in front for easy service.
- Fully insulated cabinets with faced insulation.
- Ten-year limited warranty.
- ETL listed for use with R410a when proper metering device is used.
- Many options are available.

Availability: We will accept orders for these units immediately. Normal lead times will apply.

Pricing: Units are competitively priced when compared to others with like features. List pricing is shown on the spec sheet.

Questions: Please contact Frank Clark if you have any other questions or comments or to place orders.
